Abstract (Basic): US 20040177114 A1

NOVELTY - The readable content is printed on a **greeting card** which is prepared based on user input and modifications specified by the user. A shipping label or an intermediate label which is usable with another item, is generated from the printed content.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (1) computer program product for delivering pick ticket; and
- (2) computer system for delivering pick ticket.

USE - For delivering printed material such as greeting card , customized card , gift card or certificate, promotional advertisement or catalog as pick ticket along with gift or package, to recipient in electronic commerce application.

ADVANTAGE - The shipping labels are generated and matched with the gift or package, automatically. Online selection, customization by adding text, graphics or photographs, and transmission of the pick ticket is enabled.

DESCRIPTION OF DRAWING(S) - DESCRIPTION OF DRAWING - The figure shows the block diagram of the vendor system.

Abstract (Basic): WO 200129794 A1

NOVELTY - A network accessible compilation of cards is maintained. Data identifying one of the cards and data defining modifications to cards are received. Card image with received modifications is presented in What You See Is What You Get (WYSIWYG) format. Data identifying a destination address of the card is received. The data representing modifications to the card is transmitted over computer network to database.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) Computer program product;
- (b) Computer system

USE - For electronic commerce to select, customize and coordinate greeting card delivery with gifts purchased over computer network.

ADVANTAGE - Enables the Internet user to connect directly to the master system for creation and cards purchase separate and apart from any vendor transactions by enabling the Internet user to view customization to the selected cards in WYSIWYG format.

DESCRIPTION OF DRAWING(S) - The figure shows the conceptual block diagram of element of the computer system in network environment.

Creata**Card** Plus

Graychase, Naomi

PC/Computing , March 1, 1997 , v10 n3 p195, 1 Page(s)

ISSN: 0899-1847

Company Name: Micrografx

Product Name: Creata**Card** Plus

Presents a favorable review of Creata**Card** Plus (\$30), a greeting **card** publishing program from Micrografx (888, 972). In addition to its ability to publish greeting **cards**, the program has a Forget Me Not address book and calendar that sends the users e-mail reminding them when an important event is coming up. Its Kidlock feature keeps children from accessing inappropriate material or Internet content. The program offers a link to an **online** component, which provides seasonal content and ordering forms for wrapping paper and envelopes. Includes 3,000 predesigned **cards**, but most users will prefer to create their own. Allows the import of photos or use with Micrografx professional art work and clip art to make a **card**. In addition to **cards**, the program also can create awards, certificates, invitations, and stationery. Concludes that it is ``something to write home about.'' Includes one screen display. (djd)

Title: NetMC: multimedia authoring tool for Internet

Author(s): Lassig, D.; Louie, R.; Williams, J.; Yamada, S.; Takamura, J.

Journal: NEC Technical Journal vol.50, no.4 p.53-7

Publisher: NEC,

Publication Date: April 1997 Country of Publication: Japan

CODEN: NECGEZ ISSN: 0285-4139

SICI: 0285-4139(199704)50:4L:53:NMAT;1-U

Material Identity Number: H719-97008

Language: Japanese Document Type: Journal Paper (JP)

Treatment: Applications (A); Practical (P)

Abstract: This paper describes a multimedia authoring tool, the NetMC, which provides an easy-to-use environment for novice users, and also provides an efficient way to design and create an interactive multimedia-rich Web page and presentation, if the result document is embedded. As an authoring environment, the timeline editor provides a timeline metaphor where the media files such as graphic images and audio can be put around the timeline. Also the layout editor provides a WYSIWYG environment of the media files and the media browser provides a preview of the media files' content. The NetMC project contains: 1. the development of the authoring tool; 2. a contents library providing media files such as audio, video, graphic images and samples; and 3. a greeting card service such as Christmas and Valentine's day. TEXT:

SAN FRANCISCO, Sep 14, 1999 (BUSINESS WIRE) - Flooz.com (<http://www.flooz.com>), the **online gift** currency **Web** site, has launched a redesigned site and new brand identity, designed by Interactive Bureau LLC, the leading strategic design consulting firm. Flooz.com offers visitors to their **Web** site a **Web gift** currency or "Flooz" that is accepted at over 50 **online** stores, offering products ranging from music and books to baby **gifts** and pet treats. The site offers busy professionals a flexible, fun way to shop for **gifts** for a variety of occasions.

The redesigned site allows you to send Flooz **gift** dollars to a friend, or to use the **gift** of Flooz you have received from a friend to shop at one of the **online** stores that accepts Flooz as payment. Your Flooz **gift** is accompanied by a personalized electronic greeting **card**.

"Two "sticky" features we highlight in the site are the "card of the day" feature, and a reminder service which allows anyone with an account on the site to mark relevant dates and get an email reminder of those dates," said Sam Reep, a design director at Interactive Bureau. The choice of a bright, cheerful orange to "brand" the site was no accident. "We selected the orange because it is a fun, warm color which is not gender-specific, and stands out from the vast sea of blues and grays on the Internet," said Susan Easton, Vice President for Identity at Interactive Bureau, who designed the site's new brand identity. The fun personality of brand and the **Web** site is reinforced by the balloon-like navigation tabs that guide you through the site.

"Flooz.com is a perfect example of the **Web** at it's best: a fun, efficient and interesting place for busy people to buy and send a **gift**, where the underlying technology is completely transparent." said Roger Black, chairman of Interactive Bureau.

"The concept of an Internet **gift** currency has fascinating implications," said Jack Feuer, Vice President of Marketing at Flooz. "Flooz.com is at the intersection of three popular **Web** applications; email, e-commerce and electronic greeting **cards**. We have combined these elements to create a new way for busy people to become great and frequent **gift** givers - perfect for the busy times of the new millennium."

About Interactive Bureau, LLC

Interactive Bureau (<http://www.iab.com>) a leading internet design consulting firm, was Founded in 1994 by distinguished publication designer Roger Black and veteran media executive Jock Spivy. The company brings authoritative knowledge of print and broadcast design and information management to **online** environments. Based in New York, San Francisco, and Seattle, the company has joint ventures in France,

Spain, Mexico and the U.K. Their past and current clients include: American Express, @Home, Cendant, The Discovery Channel Online, drugstore.com, Gateway, IBM, MSNBC, Oracle, Rogers Communications, and USA Today Online.

About Flooz.com

Based in New York City, Flooz.com (<http://www.flooz.com>) was created for the sale of Flooz, the online gift currency. Flooz is sent by e-mail with a content-rich, personalized greeting card, and is accepted at a wide variety of online stores, covering categories such as books, music, video, food, wine, apparel, sports equipment, toys, games, electronics, baby products, health and beauty, and specialty gifts. Users can find more than 200,000 interesting products to choose from at Floozworthy stores -- everything from Beluga caviar to custom-made golf clubs, Prada bags to Swiss Army knives. Flooz.com also offers a free, personalized reminder service for holidays, birthdays, and other special occasions. The site utilizes an innovative business method and proprietary technology for which there is a patent pending. Flooz has set up a proprietary transaction network with access points from a variety of different payment gateways over the Internet.

iVillage Co-founder Robert Levitan Launches E-commerce Site Flooz.com; New Internet Firm Transforms the Traditional Gift Certificate into a Personalized Internet Experience

Business Wire

Friday, March 26, 1999 10:28 EST

WORD COUNT: 446

TEXT:

NEW YORK (March 26) BUSINESS WIRE -March 26, 1999 - iVillage co-founder Robert Levitan announced today the launch of Flooz.com (www.flooz.com), a new e-commerce site providing consumers with a unique electronic gift giving experience. Flooz.com helps people make better and faster connections with important people in their lives. The site enables users to e-mail their friends, family members and co-workers a personalized digital greeting card with an online gift certificate that can be redeemed at any one of the numerous merchants linked to Flooz.com. Merchants range from high quality name brand retailers to unique one of a kind stores.

"Our approach is to create a win-win value proposition for our customers and our partners. Flooz.com makes both the gift giver and recipient feel special," says Levitan, Co-founder and CEO of Flooz.com, "for example, Secretaries Day (April 21) is a classic holiday that most people forget until the last minute. Flooz.com will not only remind you of this occasion in the future but will guarantee that your gift of Flooz arrives in a timely, friendly e-mail this year - and she/he will actually be able to get the gift they really want." Levitan is widely credited with developing unique marketing strategies for the Internet at iVillage.

After receiving a gift of Flooz, a term used for cash in the markets of ancient Persia, the recipient can use Flooz to purchase his choice of gifts from one or more merchants linked to the site. Navigation and search features organize gift items by category and price, helping recipients locate their selections easily. Flooz.com also offers an e-mail reminder service for all gift-giving occasions.

"I saw the opening to create a fun and warm approach to gift giving on the Internet," says Co-founder & President of Flooz.com, Spencer Waxman. "Flooz.com encompasses this experience for customers combining it with the convenience and immediacy of the medium."

"Because of the many different configurations of e-commerce stores you find on the Web," adds Chief Technology Officer and Founding Technologist, Dermot McCormack, "we have made the technology behind Flooz.com both robust and scalable so virtually every merchant we work with can integrate into our system."

Located in New York City, Flooz.com is a Web site created for the sale and redemption of flexible electronic gift certificates (Flooz) which can be redeemed at a variety of participating merchants. The site utilizes an innovative business method and proprietary technology for which there is a patent pending. Flooz.com is an entity of Great River Interactive, LLC, Inc.

Flooz.com Teams with EasySoft Inc. to Help **Online** Shoppers Find the
"Perfect **Gift**" on Mothersday.com.

Business Wire, p1610

April 27, 1999

TEXT:

NEW YORK--(BUSINESS WIRE)--April 26, 1999--

This Mother's Day, Internet users can reward their moms with an **online gift** purchase from a unique selection of merchants on mothersday.com (http://www.mothersday.com). Through a strategic partnership with EasySoft, Inc., Flooz.com (http://www.flooz.com) will offer **gift** buying opportunities on mothersday.com, as well as other seasonal holiday URLs owned by EasySoft Inc. Consumers shopping on mothersday.com will also be eligible to enter a \$1000 Flooz shopping spree sweepstakes through May 9.

Mothersday.com offers a fun, easy way for consumers to find the perfect **gift** for Mom, choosing from a select group of merchants in one location that's simple to remember. Flooz merchants located on the site include: Violet, extraordinary **gifts**; Nirvana Chocolates, sent directly from Belgium; Artisan **gifts**, distinctive **gifts** by skilled artisans; and Virtual Vineyard's ever-changing selection of wines. **Gift** selections made through Flooz stores come personalized with a digital Mother's Day greeting **card**.

"Success on the Internet is determined by the companies you partner with, especially in terms of E-commerce." says David Larkin, CEO of C4 Active Media and EasySoft. "I'm thrilled to be working with Robert Levitan and Flooz."

"We are always looking for creative e-commerce partners to help gain exposure for our merchants and make it easier for consumers to shop **online**," says Robert Levitan, CEO of Flooz.com and the co-founder of iVillage (Nasdaq: IVIL), "e-commerce sites targeted specifically to a **gift** giving occasion are a great solution to accomplish these goals."

Flooz merchants will also be featured on upcoming spring holidays and special occasion **Web** sites dedicated to Father's Day, Graduation Day, birthdays, weddings, babyshowers, bridal showers, and anniversaries. Other holiday **Web** sites featuring Flooz will include Hannukah, Christmas and Valentine's Day.

Based in New York City, Flooz.com is a **Web** site created to help people make better and faster connections with important people in their lives. The site enables users to e-mail their friends, family members and co-workers a personalized digital greeting card with an online gift certificate that can be redeemed at any one of the numerous merchants linked to Flooz.com. The site utilizes an innovative business method and proprietary technology for which there is a patent pending. Flooz.com is an entity of Great River Interactive, Inc.

EasySoft, Inc. is a New York City-based, custom software development company. For the past three years, the company has designed award-winning projects for a wide variety of high profile clients, including: The Wall Street Journal, AT&T WorldNet, ZD Net, Yamaha, Time Magazine, the United States Navy, Marvel Comics, Fleet Bank and the American Institute of Certified Public Accountants. In June, they will launch PhotoCal, their **Web**-enabled, client side calendar application.

O. Media, Inc. Announces Partnership with Kardz.com.
Business Wire, p0109
Sept 23, 1999
TEXT:

PALM SPRINGS, Calif.--(BUSINESS WIRE)--Sept. 23, 1999--

O. Media, Inc. (OTC BB:OMDA) announced today that its premier **website** for authoritative women, www.ShesGotItTogether.com, has entered into a joint venture agreement with the e-commerce **website**, www.TenDollars.com.

As a promotion for the newly launched ShesGotItTogether.com free e-mail program, ShesGotItTogether.com will award each new subscription with a ten-dollar **gift** certificate to TenDollars.com beginning October 1, 1999.

TenDollars.com is a wholly owned subsidiary of Kardz.com, a New York based venture which will revolutionize the **online greeting card and gift** market with the launch of the Kardz.com **website** in November of 1999. ~~TenDollars.com is a revolutionary e-commerce website~~ where every item is ten dollars, including tax, shipping and handling. TenDollars.com prides itself on providing the highest quality products that fit consumer demands, ranging from designer toothbrushes to elegant stationary.

Jayne Newell-Lanza, Chairperson of O. Media, Inc., stated, "The products carried on TenDollars.com are targeted towards the ShesGotItTogether.com viewers. The joint venture will be a successful marketing tool for both companies, leading to an extended profitable relationship between the sites."

Alan Levy, President of Kardz.com, stated, "This joint venture is a wonderful opportunity for Kardz.com. The ShesGotItTogether.com viewer demographic and TenDollars.com's target demographic compliment each other. With ShesGotItTogether.com's rapid growth, this will be the first of many profitable partnerships."

Note: Any statements released by O. Media that are forward-looking are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Editors and investors are cautioned that forward-looking statements involve risks and uncertainties that may affect the company's business prospects and performance. These include, but are not limited to, economic, competitive, governmental, technological, and other factors discussed in timelines.

Abstract (Basic): JP 2004126879 A

NOVELTY - The system determines whether destination e-mail address for delivery of **goods** provided in a delivery request requirement received through a network, matches with address stored in database The destination corresponding to e-mail address is acquired. Delivery request information required in order to deliver the **goods** and delivery **goods** specific information at the acquired destination is generated.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for program storing instructions for computer system.

USE - For provision of **parcel** delivery service application, such as New Year's **card**, birthday **card** using e-mail address.

ADVANTAGE - Enables to deliver the **goods**, by maintaining the privacy of the address, name and telephone number.

DESCRIPTION OF DRAWING(S) - The figure shows an explanatory structure of the computer system. (Drawing includes non-English language text).

JP 2002259795 A 7 G06F-017/60

Abstract (Basic): JP 2002259795 A

NOVELTY - The greeting media **card** which comprises the greeting element containing a advertising element, and a **gift** element selected by a sender, is transmitted to a receiver specified by the sender.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

(1) Recorded medium storing greeting media **card** delivery program;

(2) Greeting media **card** ; and

(3) Recorded medium storing stock agent program.

USE - For delivering greeting media **card** to receiver specified by sender.

ADVANTAGE - Since greeting and **gift** elements are provided based on customers selection, the design and communication of the greeting media **card** is improved, hence improving the customer satisfaction.

DESCRIPTION OF DRAWING(S) - The figure shows an explanatory drawing of the data processing system of the greeting media **card** . (Drawing includes non-English language text).

Abstract (Basic): US 20020019776 A1

NOVELTY - A customization code is generated using the data received from a sender, and is transmitted to a user along with the **gift** information. The non-customized information stored in a compact disk (62) along with a control program are selected using the customization code, and is displayed to the user.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for customized **gift** .

USE - For providing customized **card/ gift** such as greeting **cards** e.g. birthday **card**, mother's day **card** and special occasion **cards**, **gifts** like gem/birthstone, birth flowers, cellphones, software, movie, videos, tickets, clothing, fashion products, cologne/perfumes, dining and small vacation **packages**, etc with information stored in compact disk (CD) e.g. CDRom, recordable CD, DVD, etc, to specified person through Internet.

ADVANTAGE - The **gifts** are easily and efficiently provided to the user and is customized by the user for a particular intended recipient. Thus, the CD for the recipient is personalized without the need to actually provide a custom CD.

DESCRIPTION OF DRAWING(S) - The figure shows an exploded view of the instant **gift /card** providing device.

NOVELTY - Remote server accessed from sender terminals (13) for placing order for **cards**, server displays greeting / **gift cards** message, **gift card**, recipient address, payment options etc., on client monitor (14) to choose required information by sender. Based on selection, a central imaging facility with full color printer prints greeting **card** and adheres **gift card** on greeting **card** and then delivers to recipient.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for the combined greeting / **gift card**.

USE - For ordering and delivering combined **gift / greeting cards** over global network such as internet.

ADVANTAGE - The quality and speed of production minimizes the cost. Improves flexibility and options available in **card** and **gift** certificate selection and production.

DESCRIPTION OF DRAWING(S) - The figure shows the basic concept of the method of providing and ordering greeting **cards** over a wide range of computer network.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a **gift** system with which not only feeling to a company can effectively be transmitted by using a greeting **card** service on a network but also a sender and a receiver are satisfied.

SOLUTION: A server to which a plurality of pieces of commodity data are registered is prepared on the network. A commodity is selected from the server when a greeting **card** is created, and it is stored on the server on the network after a **gift** page or a catalogue page is created. A link to the **gift** page or the catalogue page is previously formed in the greeting **card**. Thus, the greeting **card** and a **gift** or catalogue are presented together.

ABSTRACT

PROBLEM TO BE SOLVED: To provide a system capable of significantly reduce the time required for the hard work of sending return **gifts** and greeting **cards** using a hand- written visitor's list.

SOLUTION: A funeral management server 1 is set up and normally connected to an Internet network 2. An environment is constructed where an Internet terminal 3 arranged at the reception of a funeral hall and a register operator terminal 5 are connected to the Internet network 2. Visitor's name **cards** 6 filled out by the attendants at the reception and name **cards** are read by an exclusive scanner 4 through the use of the environment. The information is transmitted to the funeral management server 1 and automatically listed on an exclusive homepage. The registration operator 5 inputs the information to a designation format by the registration operator terminal 5 while viewing the exclusive homepage, and immediately accomplishes the funeral attendant database. Further, a return **gift** management server 6 is connected to the Internet network 2 to deal with return **gifts**.

ABSTRACT

PROBLEM TO BE SOLVED: To interlock the distribution of a greeting **card** through a communication network to a congratulatory **gift**.

SOLUTION: An electronic **card** distribution server makes a user perform desired **card** setting-up based on selectable **card** preparation information to generate electronic **card** information and apply an ID number to the electronic **card** information. The ID number is recorded on a physical medium. The physical medium is attached onto the congratulatory **gift** and physically distributed to a receiver. The receiver can receive the greeting **card** by the ID number through the communication network. Thus, the greeting **card** can be distributed interlocking with the delivery of the congratulatory **gift**.

ABSTRACT

PROBLEM TO BE SOLVED: To select and enclose a desired greeting **card** in a commodity as a **gift** by confirming the greeting **card**, previously prepared by a seller of the commodity, on a customer's monitor screen so as to enhance the customer's incentive to purchase the commodity as the **gift**, also in mail order using an Internet.

SOLUTION: This mail order system which enables a user to access a server system of a mail-order seller from a personal terminal through the Internet and order a commodity enables the mail-order seller A to enclose a greeting **card** in the mail-order sold commodity by a storage device 14 composed of at least a customer data file 14A, a commodity data file 14B, and a greeting **card** data file 14C, a printer 15 which generates a greeting **card** 16 that a customer B desires by printing data outputted from the greeting **card** data file 14C according to an indication of the customer B, and a server system 12 which controls the storage device and printer.

English Abstract

According to the invention, a method for creating an electronic greeting **card** (700) that references a **gift** (708) is disclosed. In one step, a selection of the electronic greeting **card** is received from a sender of that greeting **card**. Identification of the **gift** (708) is received. A code indicative of the **gift** is created, whereby the code facilitates retrieving information about the **gift**. The code is embedded in the electronic greeting **card**.

Main International Patent Class: G06F-017/60

English Abstract

Methods, systems, and articles of manufacture consistent with the present invention provide the ability for an intended recipient to forward an **online gift** to a secondary recipient prior to shipping the **gift** to the intended recipient. A **gift** giver accesses a **gift** server over a network (such as the Internet) using conventional browser software on a user node of the network. While **online** with the **gift** server node (e.g., the **gift** server's **website**), the **gift** giver selects the **online gift** for the intended recipient. The intended recipient is notified of the **gift**. In response to notification of the **online gift**, the intended recipient connects **online** to the **gift** server node, reads the **gift** selection information from the **gift** queue and determines whether to forward the **gift** to someone else (e.g., the secondary recipient). If the **gift** is to be forwarded, contact information related to the secondary recipient is requested and a notification is sent to the secondary recipient about the **gift** before the initial **gift** is shipped to the initial recipient.

English Abstract

According to the invention, a method for creating an electronic greeting
card enclosing an electronic **gift** is disclosed. In one step, the
electronic greeting **card** selection is received from a sender (604) along
with a selection of at least one of a type of electronic **gift** (608), an
amount for the electronic **gift** (612), and an identifier for a receiver of
the electronic **gift** (616). Payment for the electronic **gift** is received

from a money handler chosen by the sender (620). A code indicative of the electronic **gift** is received (624), whereby the code facilitates redemption of the electronic **gift** (628). The code is embedded in the electronic greeting **card**.

English Abstract

A system for sending **cards** and/or **gifts** to one or more entity using a computer network is provided. The system can include a computer network with at least one client computer and at least one server connected to the network. The at least one client computer can have a user interface with which a user can input an entity-centric event date. The server can receive a signal from said client computer based on the user input of the event date. The server includes a time-from-event module that determines a non-yearly event date after said event date. The client computer displays the non-yearly event date and provides means for a user to purchase **cards** or **gifts** for an entity. In most preferred embodiments, the non-yearly event date is a month-from-birth date of the individual. In some preferred embodiments, the electronic **cards** include combined advertisements contained within the display regions of the electronic **cards**.

English Abstract

A greeting **card** and **gift** box composite comprising a **gift** box having a
greeting wall with an integral greeting **card** cover that opens to reveal
an interior message **card** affixed inside the **gift** box. The greeting **card**
cover is created by partially cutting through the greeting wall surface
while leaving a scored line hinge and breakaway attachment points. The
greeting **card** cover is opened by using a finger catch to lift the
greeting **card** cover, detaching the breakaway attachment points, then
hinging open the greeting **card** cover to view the interior message **card**.
The interior message **card** is aligned and removably attached to the
interior greeting wall surface, substantially covering the greeting wall
opening, while making the interior message **card** visible when the greeting
card cover is opened. The greeting **card** and **gift** box composite may be
reused by removing the used interior message **card** and installing a new one.

English Abstract
A system and method for providing integrated interactive access to at
least one business functionality makes use of computer software and
hardware and allows the user to access a service provider's hosted
application (S1) and enter a selection for at least one business
functionality (S5, S7). The user is provided interactive access to the
selected business functionality (S8) via the service provider's hosted
application and via links, for example, from the service provider's
hosted application to one or more third parties' hosted applications. In
addition, the selected business functionality is automatically integrated
for the user, for example, with one or more other business
functionalities of the user.

Abstract (Basic): JP 2003223567 A

NOVELTY - A physical medium recorded with greeting **card** specific information, is attached to a **gift** that is physically delivered to a recipient (102). The recipient after receiving the **gift**, accesses greeting **card** through communication network based on information in physical medium.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for electronic **card** distribution system.

USE - For delivering electronic **card** such as greeting **card** with **gift**.

ADVANTAGE - The electronic **card** is presented to the recipient without the recipients e-mail address, and reducing the time and effort. It is extremely effective in sales promotion of the **gift** in on - line shopping.

DESCRIPTION OF DRAWING(S) - The figure shows the structure of electronic **card** delivery method. (Drawing includes non-English language text).

Abstract (Basic): WO 200063820 A2

NOVELTY - Data indicating several products available to purchase via **webstore** (20) is provided to customer terminals (21,23) from vendors (36,37). Customer is enabled to select different delivery data of products for different recipients through customer order processor. A customer interface enables customer to initiate delivery of ordered products from different vendors to different or same recipients.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for network-based store operating method for electronic commerce.

USE - Network-based store e.g. **webstore** on internet for conducting electronic commerce especially suitable for **gifts**, greeting **cards**.

ADVANTAGE - Offers customers an enhanced on - line shopping experience, by providing improved flexibility in product selection and utilizing advanced remainder service combining product recommendations with remainder messages to assist customers in making purchase decisions.

DESCRIPTION OF DRAWING(S) - The figure shows the schematic diagram of electronic commerce system in which **webstore** operates on internet.
